

# 0. Introduction: Creating a GitHub Page

## Diseño de Interfaces Web - Bilingüe

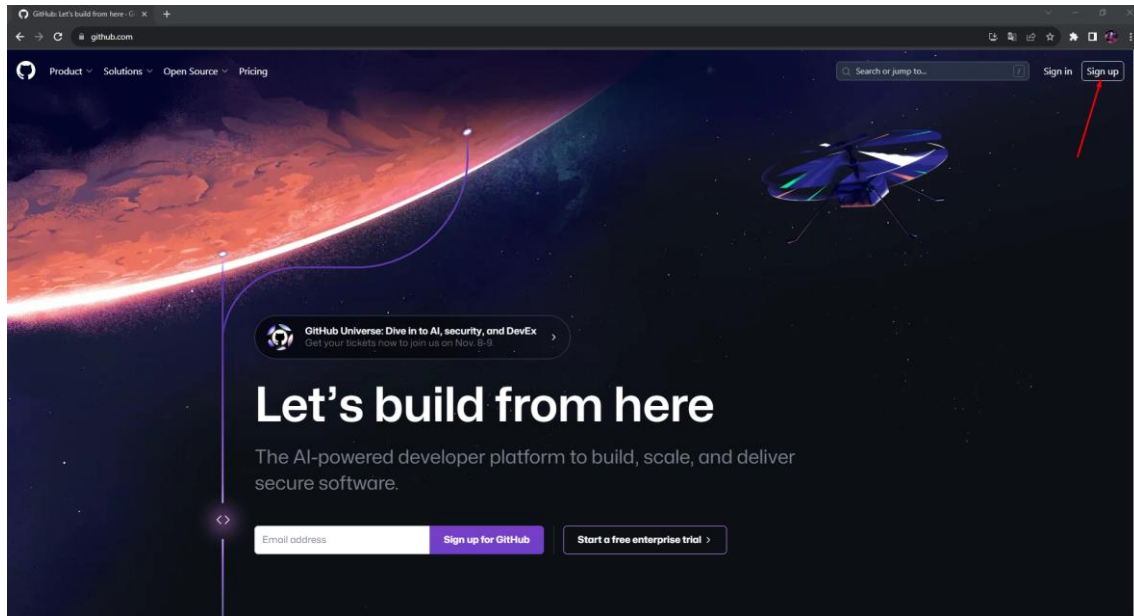

Rebeca Martínez de León, 2º DAW

## Index

1. Creating an account .....	2
1.1 Sign in onto your account .....	2
2. Creating a repository .....	3
3. Creating the HTML file .....	4
4. Uploading the HTML file .....	4
5. Modifying the HTML .....	6
5.1 Uploading the PDF .....	6
5.2 Linking the PDF to the HTML .....	6
6. Bibliography .....	8

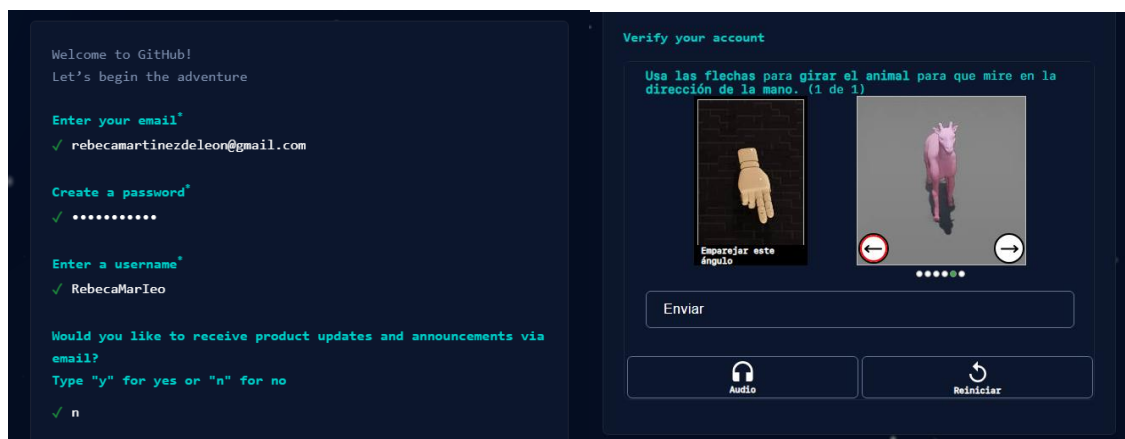

## 1. Creating an account

First of all, you must create a GitHub account. We'll go to [github.com](https://github.com) and click on the 'Sign up' button on the top right corner.

We'll be asked to introduce an email and create a password and a username for our account. You can also choose if you want to receive information about GitHub via the provided email.

Then, we'll have to go through a small captcha.

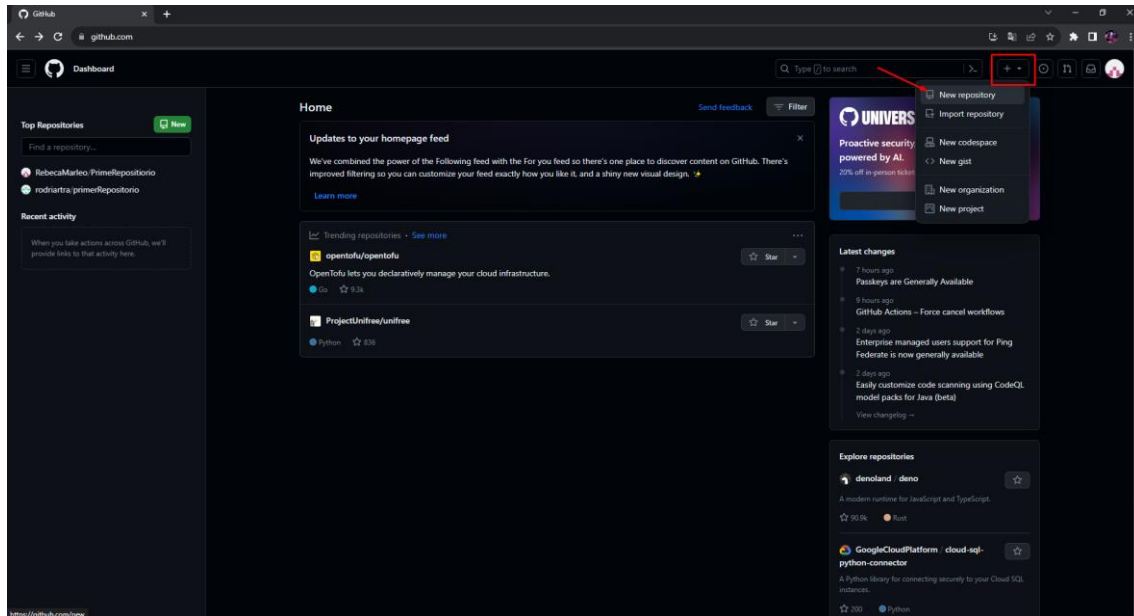

### 1.1 Sign in onto your account

If you already have an account, you must click on the 'Sign in' button right beside the 'Sign up' button.

## 2. Creating a repository

In order for our website to work, we must create a repository. To create it, we must click on the '+' button and then select 'New repository'.

The name of the repository must be your username followed by 'github.io'. For example, in my case it would be 'RebecaMarleo.github.io'.

You can also add a short description of your project if you want to.

We'll set the visibility of the repository as 'Public' and add a README file to the main branch.

Then, we'll click 'Create repository'.

### 3. Creating the HTML file

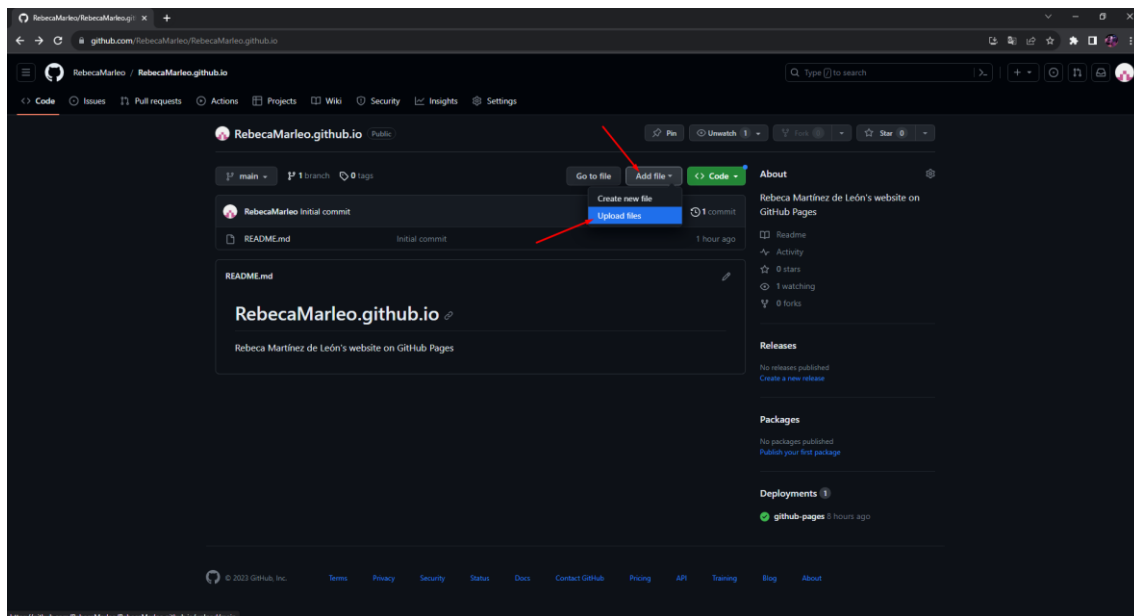

Using our preferred IDE, we'll generate an HTML file with the information we want to appear on our GitHub page.

```
index.html X
Index > index.html > html
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Index</title>
7 </head>
8 <body>
9   <h1>Diseño de Interfaces Web - Bilingüe</h1>
10  <h2>0. Introduction</h2>
11  <h3>Creating a GitHub Page</h3>
12  <h2>1. Graphic Interface Planning</h2>
13  <h2>2. Style Usage</h2>
14  <h2>3. Multimedia Content Deployment</h2>
15  <h2>4. Interactive Content Integration</h2>
16  <h2>5. Accesible Web Design</h2>
17  <h2>6. Usable Web Implementation</h2>
18 </body>
19 </html>
```

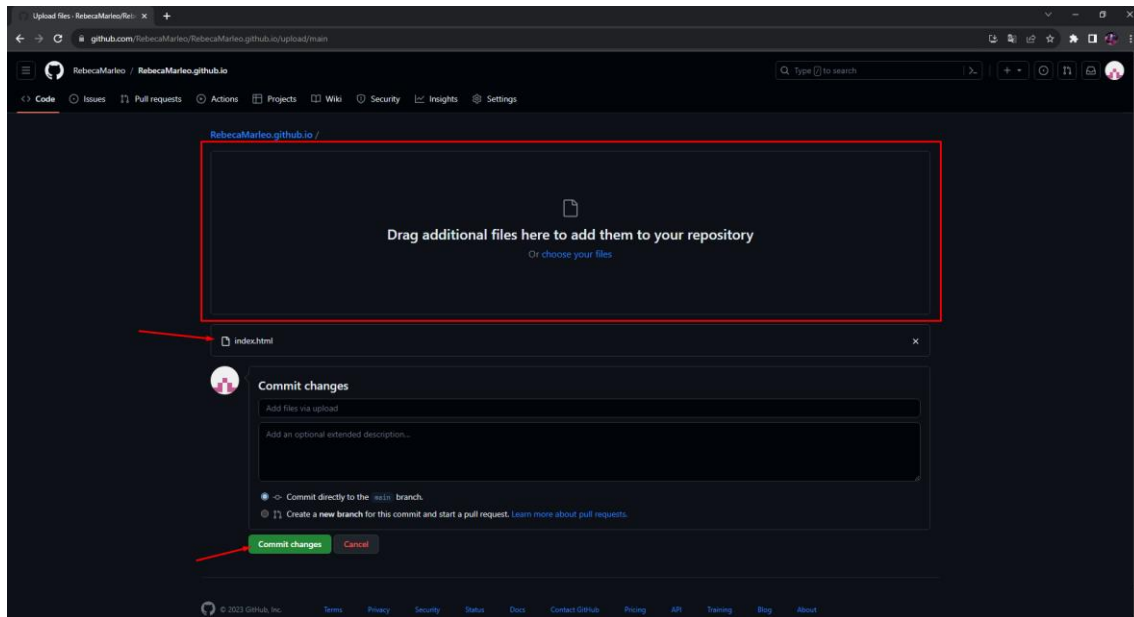

### 4. Uploading the HTML file

Next, we'll upload our HTML file onto our repository. We'll click on the 'Add file' button and then select 'Upload files'.

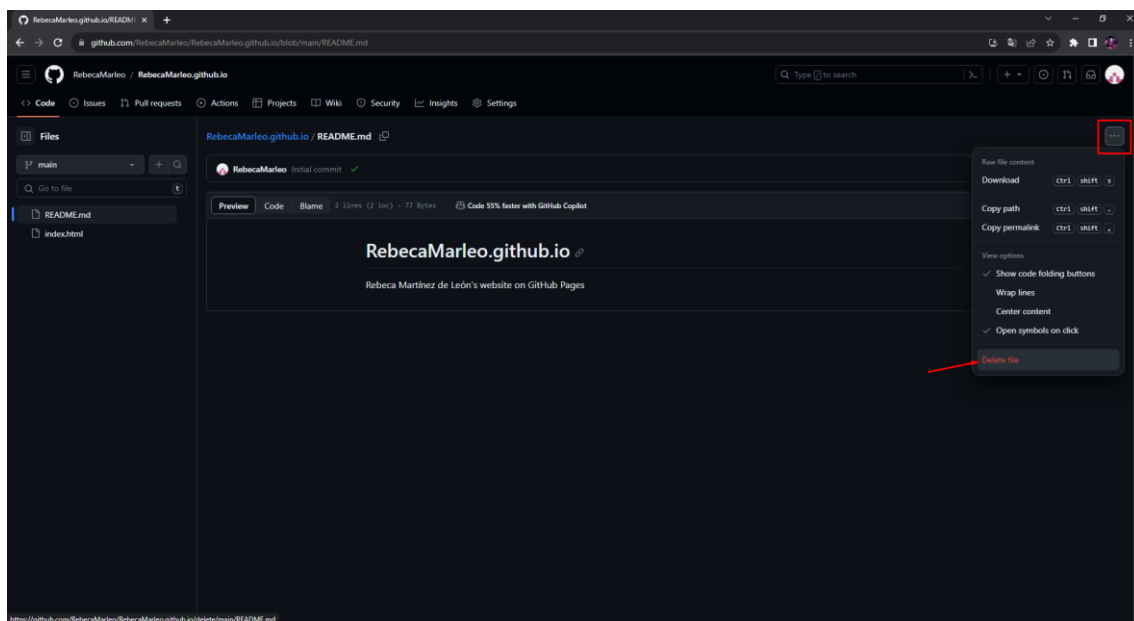

We'll upload our file by dragging it onto the specified space. We can see our uploaded file right below.

To confirm the changes we made to our webpage we must click on the 'Commit changes' button.

We'll now delete the README file so the index.html file appears when we access our page. We can add it back later and it won't interfere with the index.html file.

Let's see how the webpage looks online.

## Diseño de Interfaces Web - Bilingüe

### 0. Introduction

Creating a GitHub Page

### 1. Graphic Interface Planning

### 2. Style Usage

### 3. Multimedia Content Deployment

### 4. Interactive Content Integration

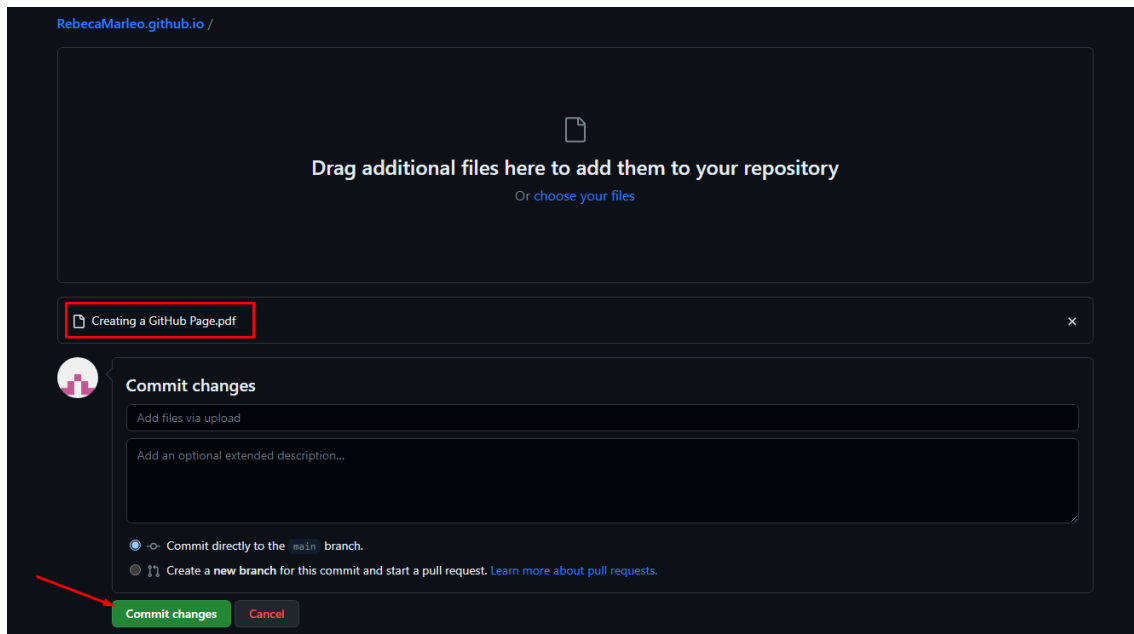

### 5. Accessible Web Design

### 6. Usable Web Implementation

## 5. Modifying the HTML

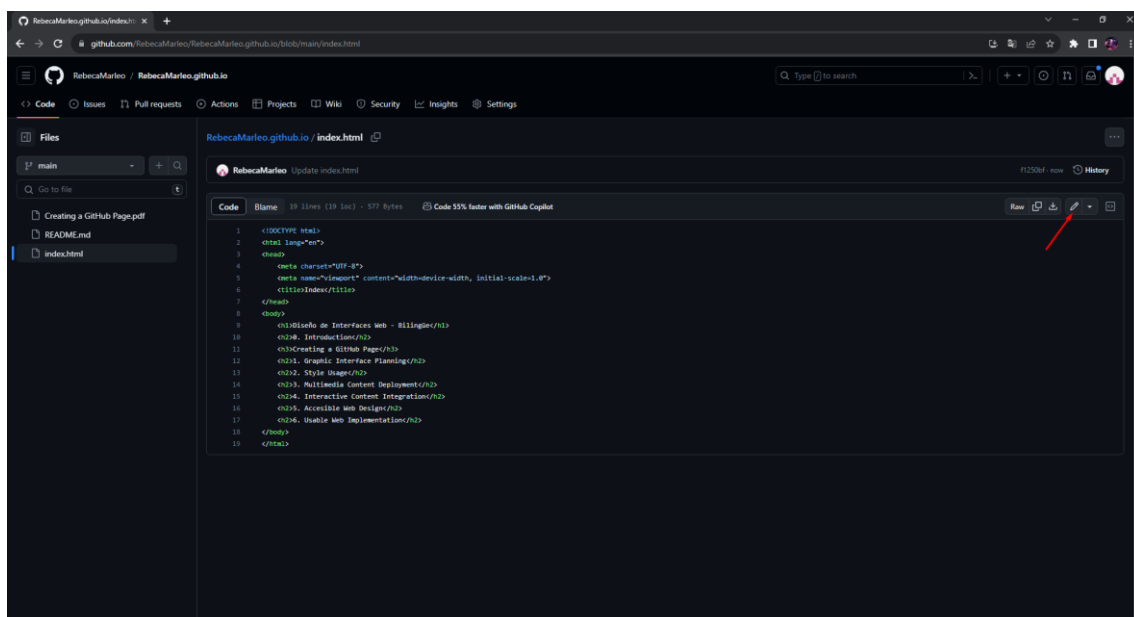

### 5.1 Uploading the PDF

Before linking the PDF to the HTML we need to have said PDF on our repository. Following the steps we established before to upload a file, we'll add the PDF to the repository.

### 5.2 Linking the PDF to the HTML

To edit our HTML file, first, we need to click on it. Then we'll click on the pencil button to edit the file.

We'll then add the following line and click on the 'Commit changes' button to save the modification.

```
RebecaMarleo.github.io / index.html in main
Cancel changes Commit changes...

Edit Preview Code 55% faster with GitHub Copilot
Spaces 4 No wrap

1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Index</title>
7 </head>
8 <body>
9   <h1>Diseño de Interfaces Web - Bilingüe</h1>
10  <h2>0. Introduction</h2>
11  <h3>Creating a GitHub Page</h3>
12  <a href="https://RebecaMarleo.github.io/Creating%20a%20GitHub%20Page.pdf" target="_blank">PDF</a>
13  <h2>1. Graphic Interface Planning</h2>
14  <h2>2. Style Usage</h2>
15  <h2>3. Multimedia Content Deployment</h2>
16  <h2>4. Interactive Content Integrations</h2>
17  <h2>5. Accesible Web Design</h2>
18  <h2>6. Usable Web Implementation</h2>
19 </body>
20 </html>
21
```

Now the link PDF appears. When we click it, it opens our PDF on another tab.
